

Air Cleaner Program

Tri-Valley Air Quality Climate Alliance is a non-profit working to ensure that everyone has access to clean, healthy air. We are providing free air cleaner units received from the Bay Area Air Quality Management District to eligible recipients (low-income households with infants and young children, pregnant women, seniors, and/or family members with respiratory conditions). The model of the units we are distributing is Winix A230, and eligible households who receive the unit will also receive an air filter replacement.
