

# Box Fan Air Cleaner Program

Tri-Valley Air Quality Community Alliance is a non-profit working to ensure that everyone has access to clean, healthy air. We are giving away box fan air filter units to our under-resourced community members in the Tri-Valley. **Supplies are limited so if you'd like one, please sign up today.**

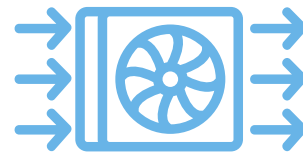

## Prepare for wildfire smoke

Wildfire smoke that gets inside your home can make indoor air unhealthy. To prepare for wildfire smoke events:

- Weatherize the home by sealing the openings
- Create a clean air room at home where the air is filtered and smoke can't get in. Use a MERV 13 or greater filter in your HVAC system.
- Go to the nearest clean air center in your area if you can't seal your home and dense smoke get in

## Create cleaner indoor air

A box fan fitted with a MERV 13 air filter is an affordable and effective option to clean the air if you can't find an air purifier. It works to capture the air of smoke, mold, pollen, bacteria and virus particles, and more.
